COVID-19 is a contagious viral illness that spreads in the air through coughing, sneezing, and talking. Recent information suggests COVID-19 is spread by people who are not showing symptoms. It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it, then touching their own mouth, nose, or possibly their eyes. Symptoms include fever, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, and diarrhea.
